EMR & PRACTICE MANAGEMENT SUITE

Building communities of medical practice

Our practice management and EMR software is designed by Physicians and clinic administrative staff, so it works the way you do and contributes to the long-term success of your practice. It is a flexible solution that is continuously updated and adapted to the needs of Physicians. The suite improves office efficiency and work flow, so you can keep the focus where it matters most - on your patients. In this suite are...

Registration

Intuitive workflow-driven registration process via the **Check-In Wizard™**.

Scheduling

Powerful schedule and resource management for solo or group practice.

Billing

Powerful and intuitive billing for procedures captured in the Pariscribe system.

Integrated Fax Service

No third-party software for fax, the clinic is in control of what and when things go out.

EMR

EMR integrates the following into one easy-to-use package:

- Cumulative patient profiles
- Progress notes
- Letters
- Reminders
- Prescription writing
- Drug interactions
- Lab results

PACS

Option of **complete PACS functionality**, all with no data, user or case charges.

Message Centre

Secure messaging internally with team members as well as external communications with referrals and patients.

Clinical Pathways

Ability to customize care plan templates based on a diagnosis with available library of templates.

Reporting

A library of standard reports with the capability of customized reports supports the clinical and administrative needs of the practice.

Features

- All relevant patient information is available at your fingertips in a single view format, presented in an intuitive manner
- Easily display and identify patient health trends with one step graph generation
- Integrated with a wide range of laboratories and hospitals
- Extensive library of custom forms and templates
